DETAILED ACTION

The proposed election/restriction listed below in this office action is being provided to further clarify which claims read on each particular species. The provisionally elected species and claims made by the Applicant with traverse in paper 4, filed April 6, 2001 was later found not to be persuasive by this office and the provisionally election was made final. However, further examination of the case showed that the election made was incomplete.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- A. Figures 14a, 14b, and 14c (claims 7-17 are believed readable by Examiner).
- B. Figures 15 and 15a (claims 8-11 are believed readable by the Examiner).
- C. Figures 16 and 16a (claims 1-6 are believed readable by the Examiner).
- D. Figures 17 and 17a (claims 1-6 are believed readable by the Examiner).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to James B. Muskal on April 4, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
